PHOTO DATA:

[REDACTED]

REMARKS:

Two probable interferometer-type instrumentation sites have been identified at the Kapustin Yar-Vladimirovka Missile Test Center. One site is located at 49°10'N/46°53'E, 3 nautical miles (nm) north-northeast of the town of Elton, and the other at 48°11'N/46°42'E, 3 nm south-southwest of Verkhniy Baskunchak. A line projected between the two sites, which are about 64 nm apart, is on an azimuth of approximately [REDACTED] Photography of [REDACTED] shows activity in the vicinity of these two sites.
